## DIGITAL KIDS: INNOVATE AND CREATE WITH THE IPAD

**Instructor: M2Academy**

Does your child enjoy using technology, but not necessarily interested in building it from scratch? Then this is the right camp for you! No tech skills needed! We do not design robots, assemble Legos, or engineer bridges; instead, we use basic existing and emerging technology as tools to complete meaningful projects. In this camp, students will have amazing opportunities to produce claymation videos, design digital art, stream self-directed movies, engage in digital storytelling, animate digital cartoons, record their own voice, construct multi-media presentations, and more - all using intuitive digital apps and devices. Students will be encouraged to then apply and integrate these important tools in their real world life - whether it is for personal or school activities. Our instructors follow a carefully designed curriculum that promotes technology as a positive tool for production, not just hardware for consumption. Students will utilize critical 21st century skills during every lesson - such as collaboration, creativity, problem solving and communication. Additionally, students will learn the importance of being safe, practicing proper digital citizenship and remembering to always use kind 'netiquette' in this globally-connected world. Feel free to bring in an iPad from home or use one provided by m2academy.

Tai Chi Chaun is basically a martial art, but consists of a system of soft intrinsic exercises. It is the body controlled by the mind. It is this mind, which is actually the moving force present in every motion. All patterns and movements are composed of circles, arcs, curves, and spirals of all sizes, going in all directions. Tai Chi Chaun builds good physique and all muscles and joints are exercised. It will improve inner body health due to deep and concentrated breathing, cultivates patience and restraint, influences nervous, cardiovascular, and respiratory and digestive systems and immensely improves balance, which normally deteriorates with age.

Each week each class member comes to class prepared to read the equivalent of one to two typed written pages. (Pieces may be handwritten). There is no formal critique of writing. Writers may ask for Suggestions by class members, many of whom have written for many years. This class is run by participants and does not have formal instruction. It is for fun, friendship and supportive feedback. Participants, who have been attending this class for several years, welcome new people. If a more formal writing class is not for you, consider this program as a place to share stories. The loss of strength and stamina that we often attribute to aging is truly caused in part by reduced physical activity. But, starting or maintaining a program can be a challenge. Lynn Ortiz with Fitness Together-Tyson's will discuss how to get started, the myths about exercise, exercise and injury prevention, the key benefits of exercise as it relates to various illnesses, and the types of exercise you need to maintain your health.
