Stemtreet's Science Explorer Camp sparks curiosity and deepens students' appreciation for science through engaging and hands-on learning experiences. Our carefully designed curriculum empowers students to become confident scientific thinkers by exploring the core principles of science. Instructor: Stemtreet

This Stemtreet camp offers two main programs: Robo-Fun and Science Fun. Robo-Fun uses robots to inspire campers to learn engineering and apply their basic science, model construction, computer programming, and problem-solving skills and knowledge to explore STEM concepts.

Stemtreet science program keeps students engaged by learning the fundamental concepts behind scientific theories and apply them through hands-on and fun activities. Each student will take an initial assessment on the first day of the program to gauge their level and create a customized learning program. They work through individualized lessons with the one-on-one guidance of an instructor and conduct hands-on activities. Our goal is to make science fun for your child!

Instructor: Stemtreet

This Stemtreet camp offers two main programs: Build Your Own Circuit brings together a wide range of concepts, from electricity to electronics. We make learning easy for children with practical hands-on activities and experiments.

Not only are these activities fun, safe, and easy, they will introduce children to the engineering field and inspire them to become tomorrow's problem solvers. Robo-Fun uses robots to inspire campers to learn engineering and apply their basic science, model construction, computer programming, and problem-solving skills to explore stem concepts.
