CODING and ROBOTICS

CODING WITH FUN AND ROBO-FUN CAMP

Instructor: Stemtree

Coding With Fun teaches students the concepts of computer programming in a fun and interactive way while developing their basic reasoning and problem-solving skills. We teach students how to create and develop computer programs (games, stories, etc.) instead of playing them. They will combine multimedia elements to create and share their own interactive stories, animations, games, music, and art. This camp uses robots to inspire campers to learn engineering, apply their basic science, model construction, computer programming, problem-solving skills and knowledge to explore STEM concepts. This program utilizes instructional time, assessments, and hands on activities to reinforce key concepts and improve problem solving skills while having fun.

BUILD YOUR OWN CIRCUIT AND CODE WITH FUN CAMP

Instructor: Stemtree

Stemtree's Build Your Own Circuit brings together a wide range of concepts, from electricity to electronics. Children are fascinated by lights and sounds, but little do they know about the circuits and electronics behind them. We make learning easy for children with practical hands-on activities and experiments. Not only are these activities fun, safe, and easy, they will introduce children to the engineering field and inspire them to become tomorrow's problem solvers. Stemtree's Coding program teaches students computer programming concepts in a fun and interactive way while developing their basic reasoning and problem-solving skills. We teach students how to create and develop computer programs (games, stories, etc.) instead of playing them.
